Business Development & Partnerships | Retail Media & Commerce | AI-Enabled

Business development professional who finds new revenue streams and runs them through to delivery. In retail media, I build new retail channels and partnerships, from first contact and the business case to negotiation, then manage the rollout as project manager. I bring a founder's view of cost and margin, hands-on data skills, and practical AI use: I build and ship my own AI apps with Claude Code.

Core Competencies

- **Business Development & Partnerships**: new revenue streams, channel and partnership development, opportunity sizing (TAM-SAM-SOM), go-to-market, contract and supplier negotiation, stakeholder management.
- **Commercial Modelling**: financial models and forecasts; business cases for new channels; comparing deal structures (revenue share, profit share, minimum guarantee) to set a negotiating position.
- **Project & Vendor Management**: multi-site rollout, scope / timeline / budget control, vendor management, cross-functional coordination across partners, suppliers and internal teams.
- **Retail Media & Commerce**: Modern Trade, shopper marketing, in-store digital media, retail media networks, rate cards.
- **Data, CRM & AI Tools**: Salesforce CRM, SQL, Python, Power BI, Looker Studio, Tableau; building with Claude Code; AI tool adoption.

Professional Experience

Actmedia **Bangkok, Thailand**
Senior Business Development *Mar 2026 - Present*

- Find new revenue streams for the company: new retail channels with Modern Trade retailers and new partners, from first contact to partnership structure and negotiation.
- Project-manage multiple live rollouts across retailer, supplier and internal teams, including a nationwide in-store screen installation that is on track to the contract.
- Fixed a mid-project supplier price increase by renegotiating and finding a new source, so installation kept moving and the budget held.
- Build the financial models and forecasts for the annual business plan, comparing revenue share, profit share and minimum guarantee to set our position before each deal.
- Review new media and AI tools for the shopper media portfolio and turn them into offers the sales team can sell.
- Lead the business side of the Salesforce CRM rollout with an external partner: planned the project, mapped the sales process, designed the screens and data fields, and ran user acceptance testing on a bug-reporting web app I built (screenshot markup, impact triage, status tracking with the partner's replies).

Casetify **Bangkok, Thailand**
Brand Representative *May 2024 - Mar 2026*

- Carried a personal monthly sales target of THB 1.1M in a flagship-format store, selling directly to customers on the store floor.
- Key person running the store on shift: floor process, service standards, escalations, and coaching junior staff on how to close.
- Used daily footfall, transaction and basket-size data to plan floor tactics, staffing and peak-hour cover.

MMB Technology Co., Ltd. **Nonthaburi, Thailand**
Sales Coordinator *Aug 2023 - Dec 2023*

- Coordinated quotations, purchase orders and delivery notes between the sales team and clients, followed up on orders and payments, and kept customer and pipeline records in the CRM.

A Bun Dance (craft burger shop) **Thailand**
Founder *May 2021 - Dec 2022*

- Founded and ran a student-targeted burger shop for 20 months: product, pricing, marketing, cost control, staff and customer experience; managed 6-8 part-time staff.
- Held gross profit at ~35% per unit through recipe costing, sourcing and portion control, and won customers through university networks and café partnerships with no paid media.

Personal Projects

LUI
Personal AI agent for macOS, solo build *2026*

- Designing and building, with Claude Code, a native macOS app (Swift) that is one front door to AI coding agents: one input to hand off work, live status of running agents, and a security gate that asks before any outbound action. Runs on my own Mac, with automated tests.

Aje
AI idea-validation workspace, solo build *2026*

- Built a working prototype that grades a business idea only on evidence: customer interviews, Thai company-registration data, search trends, test pages with PromptPay pre-orders, and a simulation of thousands of outcomes to estimate the odds of breaking even (built with Claude Code).

GoNai **gonai-three.vercel.app**
AI trip planner, solo build *2026*

- Built and launched a one-day trip planner with an AI chat on my own, from idea to a live site: product scope, database, deployment and AI integration (Next.js, Supabase, Vercel; built with Claude Code). Revives the Tripedia idea from 2022.

Cafénista
Café operations system, proof of concept *2026*

- Designed and built a proof of concept that gives a café owner one view of sales, coffee quality per cup, machine status and customers, built around a coffee-bean database. Draws on my own F&B experience.

Talatify
Fresh-market delivery platform, Co-founder *2025*

- Pitched a platform that brings fresh produce from local wet markets to restaurants and cafés. Sized the market (TAM-SAM-SOM, SOM THB 37M), set out 5 revenue streams, and built a first-year financial plan and a clickable prototype; presented at the TEP startup screening round (2025).

Education

Mae Fah Luang University **Chiang Rai, Thailand**
B.B.A. Business Administration (International Program) *Aug 2019 - May 2023*
Major: Hospitality Industry Management. President of the Hospitality Industry Management major; Assistant to the President, Student Union; Project Owner, “Open the School of Management” (2020).

Certifications, Achievements & Languages

- **Google AI Professional Certificate** – Google (Feb 2026).
- **Certified Professional Data Analyst** – DataRockie Data Science Bootcamp, 6 months, 100 hours (2023).
- **SQL (Advanced) Certificate** – HackerRank.
- **KATALYST Startup Launchpad** – final 30 of 500 teams with Tripedia, a travel-tech startup idea I co-founded (2022).
- **Supervisor Volunteer** – Techsauce Global Summit (2023).
- **Languages** – Thai (native), English (conversational).
